

GYRUS ACMI A LEGACY OF LEADERSHIP

Our mission is to anticipate the needs of surgeons and optimize patient outcomes by providing technologies that are safer, simpler to use and more cost efficient. Gyrus ACMI invests substantially in research and development to ensure that physicians have access to the latest diagnostic and surgical treatment technologies. We offer a 100-year legacy of providing unique "see & treat" solutions inspired by our continued collaboration with opinion-leading surgeons worldwide.

We take a procedural approach that encompasses every aspect of the clinical and financial challenges facing medical professionals when providing quality patient care. Gyrus ACMI delivers a broad range of differentiated products that support diagnostic and treatment needs by combining advanced visualization, powerful treatment options and the highest-quality disposables. All are backed by our customer service and commitment to training and education.

For more information on our gynecology and urology residents' skill development workshops, education tutorials and training for surgeons, nurses and hospital personnel please contact our training program manager:

RESIDENTS' SKILL DEVELOPMENT WORKSHOP

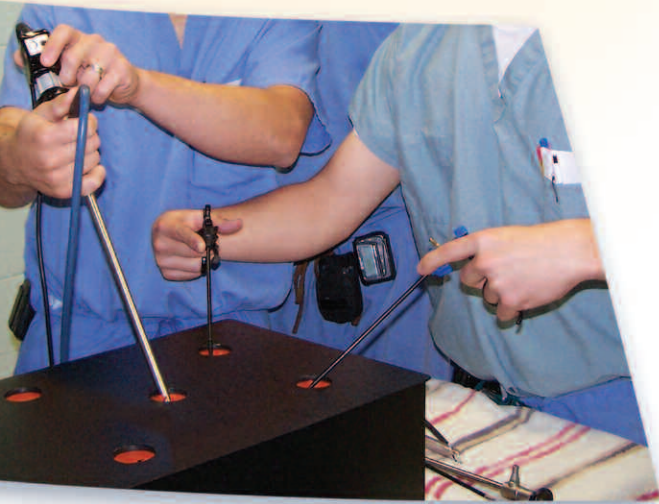

OFFERING
CUSTOMIZED
HANDS-ON LEARNING

GYRUS ACMI—YOUR PARTNER IN EDUCATION AND TRAINING

We sponsor a nationwide series of surgeon and residents' skill training workshops in urology and gynecology covering emerging technologies in endoscopy, laparoscopy and urodynamics.

At Gyrus ACMI, we are committed to working with academic institutions, hospitals, professional organizations and industry leaders to improve accessibility to the most advanced learning experience available.

We welcome the opportunity to provide the specialized training and evaluation tools your institution needs. Make Gyrus ACMI your partner in acquiring and refining new diagnostic and surgical skills for your residents.

RESIDENTS' SKILL LEARNING MODULES

 - Laser Lithotripsy
 - Ultrasonic Lithotripsy
 - Electrohydraulic Lithotripsy
- Stent Placement
- Adaptive Bipolar Tissue Management
 - Laparoscopic Techniques
 - Open Techniques
- Laparoscopy
 - Hand-eye coordination skills
- Urodynamics

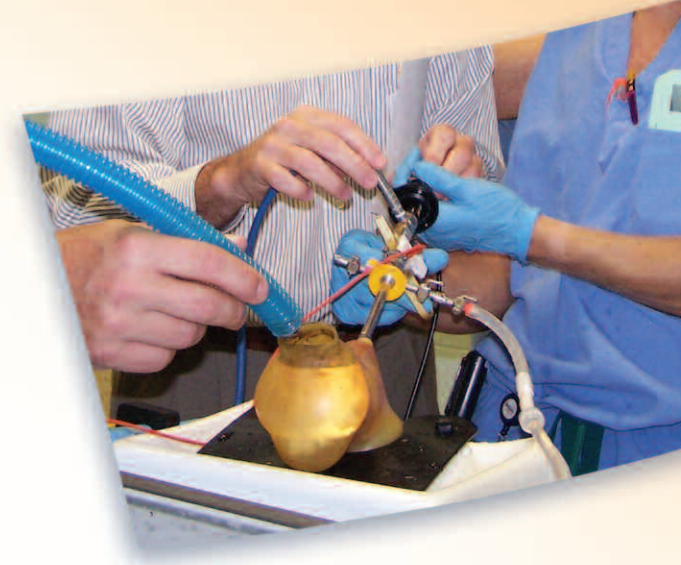

Gynecology

- Diagnostic Hysteroscopy
- Uterine Resection Procedures
 - Vaporization Techniques
 - Myoma Loop Resection
 - Endometrial Ablation
- Hysteroscopic Fluid Management
- Adaptive Bipolar Tissue Management
 - Laparoscopic Techniques
 - Open Techniques
- Laparoscopy
 - Hand-eye coordination skills
- Tubal Sterilization
- Urodynamics

PROGRAM SUMMARY

Gyrus ACMI Residents' Skill Workshops are custom designed to enhance residents' procedural knowledge and skill development with selected diagnostic and operative techniques in a non-critical environment.

Comprehensive hands-on lab stations with instrumentation and models are selected by your institution to meet your specific training requirements.

Urology and gynecology residents gain familiarity with endoscopic and laparoscopic instrumentation, energy based treatment modalities for surgical procedures and urodynamics diagnostic studies.
